INTRODUCTION

Tree climbing competitions are held in countries around the world. Each chapter or associate organization and each regional event of the International Society of Arboriculture (ISA) is allowed to send one male and one female climber to compete for the title of World Champion at ISA’s Annual International Tree Climbing Championship (ITCC). Climbers are selected as a result of their demonstrated exceptional abilities in their chapter championships.

Tree climbing competitions began in 1976, with the first ISA Tree Trimmer’s Jamboree in St. Louis, Missouri. The Jamboree was initially established to preserve classic skills so that when it came to a real-life aerial rescue, a climber with nothing more than a rope could save a life.

The competition has grown, its purpose has expanded, and the name has changed to the International Tree Climbing Championship to reflect the global expansion of eligible competitions. Competitions promote safe working practices, demonstrate improvements and innovations in equipment and techniques, and provide industry recognition to the public. It is also an opportunity for climbers to gather and exchange ideas with their professional peers.

The first competition had four events, the Work Climb, Aerial Rescue, Rope Throw, and the Footlock or Body Thrust Speed Climb. The format for the ITCC changed in 1996, introducing five new preliminary events: Work Climb (80 points), Aerial Rescue (50 points), Throwline (30 points), Footlock (20 points) and Speed Climb (20 points), for a total of 200 points. The competitors who accumulate the highest combined point totals in the preliminary events earn the right to move on to the championship round, the Masters’ Challenge.

Competitors who advance to the Masters’ Challenge start fresh and no preliminary points earned are carried forward. A total of 300 points may be earned in the Masters’ Challenge event. The winners, one woman and one man, are named the World Champions, and are also awarded an automatic position in the next year’s International Tree Climbing Championship.

This format has remained largely unchanged until 2017. With ever-evolving equipment and techniques pushing the industry forward, footlock was becoming a thing of the past. This year marks the launch of the Ascent Event as an official preliminary event. The Ascent Event is intended to push climbers to think critically about their systems and to innovate for safer and more efficient climbing systems.

Due to the technical expertise required to run the Ascent Event, its release at ITCC is a soft launch to introduce competitors, judges, and volunteers to new equipment and techniques. To help accommodate this transition, chapters and associate
organizations are given the option to hold the Footlock Event (20 points) or the Ascent Event (25 points). If the Ascent Event is run, Speed Climb will be reduced to 15 points.

COMPETITOR’S RESPONSIBILITIES

1.1 Required Meeting Attendance

1.1.1 All competitors are required to attend all mandatory meetings. Due to special circumstances, exceptions may be made only with the Head Judge’s approval. Failure to attend mandatory meetings without prior approval of the Head Judge may result in disqualification from the entire event.

1.1.2 The pre-event meetings are conducted to inspect equipment; review rules and regulations; introduce the competitors, judges, and officials; verify registrations and sign a standard insurance waiver; and discuss and answer questions before the event.

1.1.3 It is each competitor’s responsibility to bring any questions about equipment or rules and regulations to the judges’ attention at these meetings.

1.1.4 It is each competitor’s responsibility to have all new equipment approved for competition by ISA at least three months prior to the event, using the submission form at www.itcc-isa.com/equipmentapproval. No new equipment will be reviewed the day of the competition.

1.1.5 It is each competitor’s responsibility to read and understand the rules and conditions of the competition prior to the event. Competitors shall conduct themselves in a professional manner at all times during the competition. Failure to do so may result in immediate disqualification and dismissal from the event.

GENERAL RULES AND REGULATIONS

2.1 Eligibility

2.1.1 Each ISA chapter, ISA associate organization, and ISA regional event, may send only one male and one female climber to represent the chapter or associate organization at the international competition. There are two exceptions to this rule:

a. The previous year’s world champions are invited back to defend their titles. The chapters with the current world champions are
allowed to send additional climbers to compete as the chapter’s representative(s).

b. ISA may invite additional qualified climbers to compete at the international competition. Climbers shall be the champion or runner-up of a local or regional ISA-sanctioned climbing championship.

2.1.2 To be eligible to send competitor(s) to the ITCC or a regional event (ETCC, NATCC, or APTCC), an ISA chapter or ISA associate organization shall:

a. Hold a competition consisting of a set of five preliminary events, as outlined in the ITCC Rule Book, to determine finalists who compete in a Masters’ Challenge event. The competition champion is the winner of the Masters’ Challenge.

b. Adhere to all competition rules as outlined in the ITCC Rule Book as well as all other competition and equipment notifications and requirements.

2.1.3 In the event a Tree Climbing Championship (TCC) is impacted by influences outside the control of the organizers, such as inclement severe weather or other circumstances that do not allow for a safe and/or practical way to complete the planned-for Masters’ Challenge, the chapter or associate organization should declare a winner using the results of the preliminary events. The winner is the competitor with the highest combined total points from the preliminary events.

2.1.4 In the event that there are only one or two competitors in a division (male or female) at a regional, chapter, or associate organization level, the potential climber representative shall be deemed to be eligible to compete at ITCC if the criteria outlined in Appendix 4 are met.

2.1.5 All competitors shall be members of ISA prior to the start of the competition. All competitors shall be at least 16 years of age prior to the start of the competition. Competitors who are 16 or 17 years old at the start of the competition shall have legal guardian consent and may have to demonstrate the appropriate skills to compete safely.

2.2 Equipment

2.2.1 All equipment used shall be manufactured to meet or exceed the minimum accepted industry safety standard, unless otherwise specified in
this document, and shall reflect industry best practices. Equipment shall be considered appropriate for use in tree climbing. If equipment is not clearly labeled to provide an industry standard mark, it is the user’s responsibility to provide written evidence in English, to be retained by the Head Judge, that the equipment is manufactured to meet the accepted industry standard for that piece of equipment and its application.

2.2.2 All lines and components used within any configuration in a basal anchor configuration shall meet the criteria of Rule 2.2.1, and be compatible with one another. (2018)

2.2.3 It is the responsibility of each competitor, judge, technician, and/or volunteer to ensure that all equipment meets Rule 2.2.1 and is fully functional, clean, and contaminant-free. This includes ensuring that all volunteers’ cutting tools have been disinfected before starting work on the ITCC trees.

2.2.4 If a competitor has a question about the legality of a climbing technique or system, it is the competitor’s responsibility to have that technique, or system approved by the Head Technician during the competitors’ meetings the day prior to the event. The Head Technician may consult with the ITCC Chairperson and Head Judge, at which point all three will address the question and make a ruling. Prior to the competition, competitors may also visit the ITCC Rules web site (www.itcc-isa.com/rulesregulations) for more information about safety warnings and hardware configurations, and to ask questions about the legality or the approval of climbing techniques used in ITCC competitions. Final approval for competitors’ climbing techniques will be made at the competition gear inspection.

2.2.5 Any equipment that does not meet the ITCC gear inspection standards will be tagged and quarantined prior to the competition and will not be returned until the completion of the event. It is the competitor’s responsibility to claim the equipment at the time designated by the ITCC officials.

2.2.6 During the competition, if a competitor has a question about equipment or the legality of a climbing technique that cannot be answered by the Event Head Judge, the ITCC Chairperson, Head Judge, and Head Technician will address the question and make a ruling.

2.2.7 All personal climbing equipment is subject to reinspection and approval by the judges or technicians before each event. Competitors’ equipment shall meet or exceed required standards by the time s/he is scheduled to
start an event. Otherwise, the competitor shall forfeit that event. The required equipment for an event is specified in the rules for that event and is listed on the scoresheet. This equipment shall be checked off on the scoresheet at the event gate for each competitor before the competitor begins the event.

2.2.8 All rope snaps used in a fall-protection/work-positioning system shall be of the self-closing, self-locking type and shall be manufactured to meet or exceed the minimum accepted industry safety standard.

2.2.9 Screw links shall be manufactured to meet or exceed the minimum accepted industry safety standard and be mechanically tightened to ensure that they will not open during use.

2.2.10 A carabiner used as part of a climber’s primary fall-protection/work-positioning system shall be manufactured to meet or exceed the minimum accepted industry safety standard. It shall be self-closing and double autolocking and require a minimum of two separate operations to prepare the gate to open. Failure to abide by this rule may result in disqualification.

2.2.11 Carabiners used as part of a climber’s primary fall-protection/work-positioning system shall not be chain-linked to other carabiners or connecting links.

2.2.12 No equipment used in a fall-protection/work-positioning system shall incorporate quick-release mechanisms. Where applicable, quick-release mechanisms shall be replaced with a manufacturer-approved bolt and nut assembly.

2.2.13 Competitors, judges, technicians, and other approved individuals shall wear approved eye protection at all times while inside the event safety perimeter. Permission may be granted by the Event Head Judge for the climber to stop and briefly remove approved eye protection for cleaning, changing, etc. The event timing will continue and not be stopped. Approved eye protection shall be impact resistant, provide wrap-around eye protection, and be manufactured to meet or exceed the minimum accepted industry safety standard.

2.2.14 Competitors, judges, technicians, and other approved individuals shall wear appropriate head protection at all times while inside the event safety perimeter. Hard hats and climbing-style helmets shall be manufactured to meet or exceed the minimum accepted industry safety standard and have been approved by the manufacturer for use in that application. Competitors and technicians who are working aloft shall wear climbing-style helmets.
2.2.15 Competitors, judges, technicians, and officials shall wear appropriate footwear and clothing during competition. Appropriate footwear is defined as a boot that covers the foot and ankle and that is constructed with a suitable sole and upper portion. The upper portion of the boot should provide protection from penetration. The sole should provide proper traction for work on the ground as well as when working aloft. ITCC-issued clothing shall be worn while participating in the preliminary events, the Head-to-Head Footlock competition, the Masters’ Challenge, and at all award ceremonies.

2.2.16 All activity aloft (Work Climb, Masters’ Challenge, Aerial Rescue, Ascent Event, and Belayed Speed Climb) shall be done with the aid of a work-positioning or fall-protection system. A competitor shall be secured at all times while ascending into the tree, while performing the event task, and until s/he returns to the ground.

2.2.17 A suitable fall-protection system requires that the climbing line always be anchored above the climber.

2.2.18 When footlocking, a competitor shall not wrap the Prusik cord around his/her arm.

2.2.19 Infractions of the work-positioning/fall-protection rule will result in lost points or disqualification at the discretion of the judges. Infractions include failure to manage slack (not having so much slack in the climbing line that the loop of slack hangs below the competitor’s knee), or brief instances of being open to a fall or climbing above the tie-in point. Flagrant disregard for this rule will result in disqualification.

2.2.20 It is a competitor’s responsibility to show that all cordage used as a climbing hitch in a moving rope (dynamic overhead belay climbing) system or as a climbing hitch/friction hitch in a stationary rope (static) climbing system has been approved by the manufacturer for use in that application.

2.2.21 Lines used for work positioning when using a moving rope system (see Appendix 5) shall be a minimum of 11 mm diameter and shall have a minimum breaking strength of 22 kN. Ropes used for ascending and stationary rope systems (see Appendix 5) shall be a minimum of 10 mm in diameter and shall have a minimum breaking strength of 22 kN. When using stationary rope systems, the competitor shall use a device that meets the criteria indicated in Rule 2.2.1 and is approved by the manufacturer for stationary rope systems as a stand-alone device. The device shall also be compatible for use with the line’s diameter and construction.
2.2.22 Friction hitch cords for moving rope applications and those which support the entire system load (stationary rope applications) shall be of a doubled configuration if less than 10 mm and a minimum diameter of 8 mm. They shall also meet the requirements of Rule 2.2.1. Friction hitch cords for stationary applications, where the load applied to the hitch is approximately half the system load, shall be of a doubled configuration if less than 8 mm and a minimum diameter of 6 mm. Friction hitch cord shall be manufactured from material(s) suitably resistant to the abrasion and temperatures experienced during work and rescue scenarios. Competitors shall perform an “on-rope test” to demonstrate the effectiveness and adjustment of all friction hitches. (2017)

2.2.23 Cords used for work-positioning lanyards shall be a minimum of 10 mm in diameter, and shall meet the minimum strength standards established for climbing lines and meet requirements of Rule 2.2.1.

2.2.24 The non-working end of any lanyard used in a fall-protection/work-positioning system shall have a fixed termination, such as a fixed stopper knot, eye splice, stitched eye, etc., that does not permit the non-working end of the lanyard to advance through the friction device (friction hitch, frame-loaded ascender, cam-loaded ascender) or be securely connected to a rated connection point on the harness.

2.2.25 For the purposes of clarity in this rules document, the term “climbing hitch” includes both traditional hitches tied with cordage (Prusik, Valdôtain Tresse, etc.) as well as approved mechanical hitches. All climbing hitches shall be approved prior to being allowed for use in the competition.

2.2.26 A minimum of a double fisherman’s bend shall be used to form the Prusik loop. Variations, including an endless splice, may be used with prior approval of the ITCC Head Technician. When footlocking using a Prusik loop, a six-coil Prusik hitch, a Klemheist, or other approved secure friction hitch shall be used for fall protection.

2.2.27 Climbing hitches shall not be used for descent when using stationary rope systems, unless they are part of an approved configuration or system.

2.2.28 A competitor is not permitted to place his/her hands on or above the friction hitch when it is used to support the full weight of the climber and is as the only means of being secured on a stationary rope system (static line). The first offense will generate a warning or penalty; a second offense will generate a disqualification. (2018)
2.2.29 A competitor who utilizes a mechanical ascender as a part of a stationary (static) rope system shall also include a system of backup to protect against an ascender malfunction. Mechanical ascenders, on a stationary (static) rope system, can be backed up with another ascender on the same line or a pliable Prusik cord that is placed above the mechanical ascender and on the same line as the ascender. If a double-line ascending system is used, both sides of the line shall be backed up independently. Prusik cordage shall meet the requirements of Rule 2.2.22 and shall be able to immediately grip and hold the line and support the competitor’s weight should an ascender fail. All mechanical ascender-climbing systems shall be demonstrated and are subject to the Head Technician’s prior approval.

2.2.30 Competitors may work from a stationary (static) rope system provided that when using an in-line configuration, engaged ascenders are not within the anchoring system. Fall-protection anchoring systems shall include an approved stopper knot, or hitch on the stationary (static) rope system no more than 45 centimeters (18 in) below the anchoring system, unless the climbing system is directly connected to an approved knot in the access line. Techniques for working from a stationary (static) rope system using an in-line anchor shall be demonstrated prior to use and during gear inspection, and shall have prior approval of the Head Technician.

2.2.31 A competitor will not be permitted to place his/her hands on or near the cams of ascenders unless the competitor is appropriately secured. The first offense will generate a warning; a second offense will generate a disqualification.

2.2.32 The competitor may not throw or lower or drop any piece of equipment or gear from the tree while working aloft without prior approval from the Event Head Judge. Violation of this rule will result in the competitor being disqualified from that event. (2018)

2.2.33 A competitor will be disqualified for dropping a piece of equipment (accidentally or unannounced) while working aloft. This rule applies only to the actual timed portion of an event. A competitor who drops equipment (accidentally or unannounced) while aloft, but prior to the beginning of the timed portion of the event, will be issued a warning for a first offense; a second offense will generate a disqualification. (2018)

2.2.34 A competitor shall sound the audible warning, “Stand clear,” in any situation where there is the potential for an item (any equipment, or
part of the tree) to fall. Unless otherwise specified in an individual event, failure to call a warning will result in a 3-point penalty. A second offense will result in disqualification. (2017)

2.2.35 No climbing equipment (harnesses, work-positioning lanyards, ascenders, etc.) shall be altered in a manner that would compromise the integrity of the equipment. (i.e., drilling holes in or welding ascenders together). No alterations to equipment from its original manufacturer’s design will be allowed without the express written consent of the manufacturer.

2.2.36 A competitor using a secondary work-positioning system (lanyard) shall not attach both anchoring points of the system to the same side D-Ring(s) of the harness. Correct loading configurations include:

- Connection from side D-Ring to opposite side D-Ring for horizontal work positioning; shall not be used for suspension.
- Connection to both front D-Rings where available; may be used for suspension if so indicated by manufacturer of the harness.
- Connection to a fixed or sliding ventral attachment point, singled or doubled; may also be used for suspension. When connecting from the ventral attachment point in a singled configuration and attaching the work-positioning system around a limb back onto a tie-in point on itself, correct loading of the connecting link shall be ensured at all times.

2.2.37 Competitors may use the handsaws provided, or they may use their own handsaws. The teeth of the handsaw shall be covered or removed to prevent injury and also to prevent cutting the bells out of the tree during the competition. Handsaws held in the mouth will result in disqualification.

2.2.38 Handsaws used in competition shall be no longer than 58 centimeters (23 in) or shorter than 33 centimeters (13 in) when measured from the tip of the blade to the end of the handle in a straight line.

2.3 Other

2.3.1 Competitors will be advised in advance of the competition of any rule changes or modifications to the competition setup deemed necessary for the safety of the competitors or the competitive requirements of the event.

2.3.2 Competitors shall not watch or be in the immediate area during the set-up of competition events. Failure to abide by this rule will be viewed as
misconduct (see Rule 2.3.10).

2.3.3 A random drawing is held by the championship committee before the organization meeting to determine the order in which the participants will complete the events.

2.3.4 It is the responsibility of each competitor to be at each event at the scheduled time.

2.3.5 Competitors shall report to the Event Head Judge before they are scheduled to start an event. If a competitor does not report to the Event Head Judge within 5 minutes of the scheduled starting time, the competitor forfeits that event.

2.3.6 Competitors not currently competing shall not approach or talk to event judges while the contest is in progress without the prior consent of the Event Head Judge. Failure to abide by this rule may result in disqualification.

2.3.7 Competitors may file an official protest if they feel they have been judged unfairly or incorrectly. Protests shall be made on an official protest form, which is available from the TCC Chairperson.

2.3.8 All protests shall be signed and submitted in writing by the competitor to the TCC Chairperson within 1 hour of the alleged rule infraction. The TCC Chairperson, Head Judge, and Head Technician will review the protest and make a ruling.

2.3.9 Misconduct in the presentation or discussion of protest is cause for immediate withdrawal of protest rights and/or possible disqualification.

2.3.10 A misconduct disqualification will be enforced by the Head Judge on any competitor who has displayed inappropriate, unprofessional, and/or unsportsmanlike behavior during participation in or after the completion of an event. Event Head Judges will enforce the rules for their individual event including infractions of the misconduct rule.

2.3.11 The use of alcoholic beverages or illegal drugs by any competitor, judge, technician, or official will result in immediate disqualification and removal of the individual from participation in the championship events.

2.3.12 It is the responsibility of the judges, technicians, and officials to read and understand the rules and regulations, to be able to interpret them in the spirit of the competition, and to enforce the competitors’ adherence to them. All judges, technicians, and officials are expected to conduct themselves in a professional and appropriate manner at all times during
the competition.

2.3.13 Once a competitor has begun an event, the Event Head Judge may instruct the competitor to stop if the judges need time to assess potential safety concerns, clarify rules, or take a closer look at equipment installation. The clock will stop with no time penalty to the climber. Official time will begin again when the Event Head Judge says “Go” and instructs the competitor to proceed.

2.3.14 A competitor may not leave the designated event area or bring additional equipment into the event area once s/he has started the event.

2.3.15 A competitor cannot score less than 0 in any of the five preliminary events.

WORK CLIMB EVENT

3.1 Event Summary

The Work Climb Event tests the competitor’s ability to move about the tree using a climbing line and harness. The event setup is the same for both male and female competitors. Each competitor starts from a staging area in the tree and is required to visit five work stations throughout the tree, performing a specified task at each station. Each station in the tree is equipped with a bell (or horn); the competitor shall ring the bell (or sound the horn) before continuing to the next station.

Competitors earn objective points for successfully completing the task at each station and ringing the bell (or sounding the horn) with either a handsaw, pole pruner, or hand, as indicated. At certain stations, a competitor can earn points for completing the additional tasks. Competitors can also lose points for failing to properly complete certain other tasks.

Competitors earn subjective points based on safety, control, style, poise, and creativity at the discretion of the judges. Finally, a competitor can be penalized for unsafe or uncontrolled acts at the discretion of the Event Head Judge. A second unsafe or uncontrolled act could result in disqualification.

The time limit for this event is 5 minutes.

3.2 Work Climb Rules

3.2.1 Each competitor shall be equipped with, and use, (an):

- approved climbing-style helmet,
• approved eye protection,
• approved tree-climbing harness,
• approved (work-positioning) lanyard,
• approved climbing line,
• appropriate clothing and footwear, and
• approved handsaw, and scabbard.

3.2.2 All equipment and practices shall satisfy applicable industry safety standards.

3.2.3 The competitor’s climbing line is set in a predetermined tie-in point. The same tie-in point is to be used by all competitors. Competitors may choose their own route and climbing line placement through the work stations unless otherwise directed by the Event Head Judge, but competitors shall finish with the landing station.

3.2.4 Once a competitor has been identified to the judges, the competitor is asked if he or she has any questions and is reminded of the event requirements.

3.2.5 The judges start the clock when a competitor signals to the judges by sounding an air horn or bell in the tree. The judges stop the time when a competitor has safely landed, is in a standing position, and has fully disconnected the climbing line and friction hitch from the tree-climbing harness.

3.2.6 Competitors shall be safely tied in with a climbing line and/or secured with a work-positioning lanyard at all times while in the tree. While at each work station (handsaw, limb toss, pole pruner, and limb walk) the competitor shall be safely tied in with a climbing line and shall be correctly secured with a work-positioning lanyard before ringing the bell (see Rule 2.2.36). A competitor who breaks this rule will receive a warning and a 3-point penalty. A second failure to use the work-positioning lanyard correctly will result in disqualification. Competitors are not required to lanyard in prior to sounding the horn/bell at the landing station.

3.2.7 If a competitor breaks a large branch, or is for any reason considered by the judges to be performing an unsafe practice, penalty points will be assessed and/or the competitor may be disqualified at the discretion of the Event Head Judge.

3.2.8 Competitors shall complete the task at each work station to earn points for that station. If a competitor fails to complete the task, no scoring or
discretionary points are earned or lost for the station(s). (2017)

3.3 **The Handsaw Station**

3.3.1 To complete the task at this station, the competitor shall:
- Lanyard in.
- Call for “Stand clear” prior to ringing the bell.
- Ring the bell with his/her handsaw.

To earn maximum scoring points, the competitor shall also:
- Use his/her lanyard correctly.
- Ring the bell with two hands on the handsaw before continuing to the next station.

3.4 **The Limb Toss Station**

3.4.1 To complete the task at this station, the competitor shall:
- Lanyard in.
- Call for “Stand clear” prior to ringing the bell.
- Ring the bell with his/her handsaw.

To earn maximum scoring points, the competitor shall also:
- Use his/her lanyard correctly.
- Ring the bell with two hands on the handsaw, prior to throwing the first limb at the target on the ground.
- Hit the target on the first throw.

3.4.2 This station is equipped with two sections of limb for each climber and a target on the ground. The dimensions of the limbs shall be approximately 30 centimeters (12 in) long and have a diameter of approximately 5 centimeters (2 in). The diameter of the target on the ground shall be 75 to 125 centimeters (30 to 48 in).

3.4.3 A competitor shall not throw two limbs at the target at the same time. If a competitor attempts to toss two limbs at the target at the same time, neither of the limbs thrown at the target can score.

3.4.4 A competitor receives 3 points if the limb lands fully within and remains fully within the target on the first throw. The limb shall not
bounce into the target.

3.4.5 If unsuccessful with the first attempt, a competitor may throw a second time and will receive 2 points if the limb lands and remains fully within the target. The competitor does not need to re-call “Stand clear” prior to throwing the second limb.

3.4.6 If a competitor misses on the second throw, no throwing points are received.

3.5 The Pole Pruner Station

3.5.1 To complete the task at this station, the competitor shall:
• Lanyard in.
• Call for “Stand clear” prior to ringing the bell.
• Ring the bell with the pole pruner.

To earn maximum scoring points, the competitor shall also:
• Use his/her lanyard correctly.
• Ring the bell with two hands on the pole.
• Use the working end of the pole pruner.
• Correctly re-hang the pole pruner.

3.5.2 A 3-point penalty will be given if a competitor rings the bell with the wrong end of the pole pruner.

3.5.3 Before moving to the next station, a competitor shall successfully re-hang the pole pruner in the same location and position. If the competitor fails to do so and is instructed by the Event Head Judge to return to the station and re-hang the pole pruner correctly, a 3-point penalty will be assessed. Time will continue during this process.

3.6 The Limb Walk Station

3.6.1 To complete the task at this station, the competitor shall:
• Start the station by touching the predetermined mark on the limb with at least one foot.*
• Walk out on the limb.
• Lanyard in.
• Call for “Stand clear” prior to ringing the bell.
• Ring the bell.
• Walk back to and touch the predetermined mark.

To earn maximum scoring points, the competitor shall also:

• Use his/her lanyard correctly.
• Touch the predetermined mark again without the plumb bob touching the highest height marker.

*The predetermined mark shall be a minimum of 30 centimeters (12 in) wide.

3.6.2 Competitors, once past the predetermined mark, shall walk on and keep a minimum of one foot in contact with the limb at all times. If a competitor loses control and falls, or swings from the limb, s/he shall return to the last point of contact before proceeding. The Event Head Judge will determine the last point of contact. (2017)

3.6.3 If a competitor successfully completes the task at the station and rings the bell without the plumb bob touching predetermined height markers, 2, 4, or 6 additional points are awarded. The plumb bob is set to measure both vertical and horizontal branch movement. If a competitor successfully completes the task without causing excessive branch movement, 2, 4, or 6 additional points are awarded, based on predetermined marks. (2018)

3.7 The Landing Station

3.7.1 To complete the task at this station, the competitor shall:

• Call for “Stand clear” prior to ringing the bell
• Sound the horn/bell with their hand. (2018)

To earn maximum scoring points, the competitor shall also:

• Land and remain standing upright
• Land with both feet inside the inner ring of the target.

The competitor is not required to lanyard in prior to sounding the horn or bell by hand.

3.7.2 A competitor who doesn’t land and remain in a standing position (i.e., falls during landing or touches the ground with any part of the body other than feet) will not receive the 3 scoring points for landing and remaining standing up.

3.7.3 The target for the landing shall be 2 meters in diameter. A 1-meter-
diameter solid circle is drawn in the center of the target and is identified as the inner ring of the target.

3.7.4 Competitors can receive up to 4 additional points for landing in a standing position on the target. Competitors shall land with both feet planted and under control. When a competitor lands with one foot, that foot shall remain in the same position, but may change orientation, until the second foot is planted; at this time the score will be determined. A competitor can land outside the target with the initial contact foot and step into the target to increase points; however, should the competitor attempt to increase points by moving the initial contact foot, zero bonus landing (inner ring/outer ring) points will be awarded.

3.7.5 If any part of the foot touches the line, a competitor is scored as going outside the line. (Example: One foot on the outer circle line and the second foot out of the outer circle is scored as 0 points.)

3.7.6 Time stops when a competitor has landed, is in a standing position, and has fully disconnected the climbing line and friction hitch from the harness.

3.7.7 A competitor who does not sound the horn or bell by hand before descending will not receive any points for completing the task or any additional points at the landing station, and additionally, no Time Points will be awarded. (2018)

3.7.8 A mark on the lower part of the tree shall be made to indicate the start of the landing zone. A competitor who touches the tree below that mark or any other objects below the mark will be deemed to have landed and will receive no landing (target) points for that station. The competitor will also not receive 3 points for landing with only feet touching the ground. (2017)

3.8 Scoring the Work Climb (80 possible points)

3.8.1 There will be either three or five Work Climb judges. When five judges are available, the high and low scores are thrown out, and the remaining three scores are averaged to provide the official score.

3.8.2 Scoring for this event is based on two categories: assessment of tasks completed and time.

3.8.3 Fifty potential points can be earned including scoring points and judges’ discretionary points.
3.8.4 No scoring points are awarded for any task not completed correctly. To receive scoring points at any of the work stations, competitors shall complete all tasks as outlined in 3.3.1, 3.4.1, 3.5.1, 3.6.1, and 3.7.1.

3.8.5 Penalty points are levied for various infractions, including failure to use a lanyard correctly, failure to call a warning, failure to use the working end of the pole, and failure to re-hang the pole properly.

3.8.6 Judges award discretionary points at each station based on performance. Bonus points are awarded for good performance and penalty points are awarded for poor performance (see bonus/penalty guidelines on Quick Reference Guide).

3.8.7 The event is also timed with up to 30 potential Time Points.

3.8.8 The competitor with the fastest time earns 30 points.

3.8.9 Other competitors receive a 1-point deduction from the 30-point total for every 10 seconds their time exceeds the fastest time.

3.8.10 If a competitor reaches the time limit and has not finished the event, or has not rung the bell at each work station, s/he will not receive any Time Points for the event and will only receive scoring points accumulated up to that point. Judges’ discretionary points may be assigned up until the time limit is reached (see Rule 3.2.8). (2017)

3.8.11 In case of a tie, the competitor with the fastest time wins.

3.9 Penalties

Mandatory Penalties (determined by the Scoring Judges)
A mandatory penalty of 3 points will be deducted for each of the following violations:

3.9.1 Failure to use work-positioning lanyard correctly when required.

3.9.2 Failure to issue an audible warning. (2017)

3.9.3 Failure to use the working end of the pole pruner to ring the bell.

3.9.4 Failure to properly re-hang the pole pruner.

Discretionary Penalties
A 3-point penalty and audible warning will be given by the Event Head Judge for any of the following infractions:

3.9.5 Dangerous uncontrolled swing.
3.9.6 Failure to maintain a taut climbing system or climbing above the tie-in point.
3.9.7 High-speed or dangerous movement.

3.10 Disqualification

Mandatory Disqualifications
A competitor will be disqualified by the Event Head Judge for the following infractions:

3.10.1 Dropped piece of equipment.
3.10.2 Any piece of equipment left in tree except the pre-installed climbing line.
3.10.3 Breaking of sizable branch (branch size to be decided prior to the event, at the Event Head Judge’s discretion).
3.10.4 Failure to remain tied in to the tree on at least one point of attachment.
3.10.5 Being more than 5 minutes late for event.
3.10.6 Placing handsaw in the mouth.
3.10.7 Misconduct.
3.10.8 A second discretionary penalty.
3.10.9 A second failure to use a work-positioning lanyard when required.
3.10.10 A second failure to issue an audible warning. (2017)

4 AERIAL RESCUE EVENT

4.1 Event Summary
The Aerial Rescue Event is a timed event that tests the competitor’s ability to climb to and safely lower a climber who is unable to descend without assistance. The event setup is the same for male and female competitors.

Prior to the event walk-through, the Event Head Judge provides the competitors with the event scenario (see Appendix 3 for examples of event scenarios.) The rescue scenario explains the injuries and details of the climber’s situation.

Competitors shall perform a risk assessment, a pre-climb assessment, and an on-site casualty assessment, and should use all relevant techniques to ensure that the rescue process does not exacerbate the situation. The injured climber
(dummy) should be lowered as safely, carefully, and efficiently as possible.

The competitor, as first responder, will assume control of the site, take control of all relevant safety issues, and ensure that local emergency services are contacted.

**Event Setup:** The injured climber (represented by a dummy) weighing 60–80 kg (132–176 lbs) is installed in the tree with a regulation climbing line and harness preferably no higher than 7.5 meters (25 ft) above the ground. The competitor shall enter the tree using a previously installed climbing line, installed no closer than 4.5 meters (15 ft) from the injured worker. Competitors are provided with 5 minutes to complete the event.

**4.2 Aerial Rescue Rules**

4.2.1 Each competitor shall be equipped with, and use, (an):
- approved climbing-style helmet,
- approved eye protection,
- approved tree-climbing harness,
- approved work-positioning lanyard, and
- appropriate clothing and footwear.

4.2.2 Competitors shall enter the tree using the installed line.

4.2.3 Competitors may not use the injured climber’s line to enter into or descend from the tree.

4.2.4 Competitors shall lower the injured climber on the injured climber’s line or an approved line other than the competitor’s own unless Rule 4.2.5 is used.

4.2.5 When a rescue dummy is used and fitted with an approved independent fall-arrest system during the event setup meeting the requirements of Rule 4.2.6, the casualty may be transferred to and lowered on the competitor’s climbing system, but the dummy shall remain attached to the independent fall-arrest system at all times. When using only the competitor’s climbing system for lowering the casualty, the anchor point shall be strong enough to hold the increased weight. Prior to the rescue dummy being detached from its climbing system, additional friction shall be added to the competitor’s system to safely manage the anticipated weight.

4.2.6 When using fall-arrest equipment, a full-body harness shall be used and attached dorsally to the dummy. The fall-arrest system shall be
manufactured to meet or exceed the minimum accepted industry safety standard and shall be of the inertia-reel type. The system shall be calibrated to the weight of the dummy and drop tested prior to the event.

4.2.7 The competitor shall issue the audible warning, “Stand clear,” before lowering the injured climber safely to the ground.

4.2.8 Once a competitor has been identified to the judges, the competitor is asked if he or she has any questions and is reminded of the event requirements.

4.2.9 Timing begins when the Event Head Judge says “Go” and instructs the competitor to proceed.

4.2.10 Competitors shall remain tied in on a separate climbing line or secured with a work-positioning lanyard throughout the event.

4.2.11 Competitors may work off the pre-installed access line or may carry another climbing line into the tree (see Rule 2.2.29 and 2.2.30).

4.2.12 Time is stopped when a competitor has lowered the injured climber (dummy) safely to the ground and has unclipped the climbing system from the injured climber’s (dummy’s) harness. In the case of a scenario as outlined in Rule 4.2.5, time is stopped when the dummy has been unclipped from the competitor’s climbing system.

4.2.13 If a competitor runs out of time before unclipping the injured climber from the climbing harness, the competitor shall stop the climb and follow the instructions of the Event Head Judge.

4.2.14 A competitor who fails to finish within the time limit will be called to the ground. The competitor receives points only for tasks that were completed within the time limit. The competitor is still eligible to receive points in any of the 5 scoring sections, even if all the tasks pertinent to that section have not been completed. (2017)

4.2.15 If a competitor enters the tree using an ascending technique NOT approved for descent or lateral movement, the competitor shall, if required, lanyard in, and then tie in with an approved climbing hitch before beginning to move laterally in the tree. The maximum allowable distance of the lateral movement prior to the competitor tying in with an approved climbing hitch will be predetermined by the Event Head Judge. The first offense will generate a warning; a second offense will generate a disqualification.

4.2.16 A competitor may leave equipment in the tree provided the Event Head
Judge is informed before the climb. The Event Head Judge then makes arrangements to retrieve the equipment at the end of the competitor’s climb.

4.3 **Scoring the Aerial Rescue** *(50 possible points)*

4.3.1 There will be either three or five Aerial Rescue judges. When five judges are available, the high and low scores are thrown out, and the remaining three scores are averaged to provide the official score.

4.3.2 Up to 45 points are awarded in total for five scoring sections. Each scoring section is worth between 7 and 13 points as detailed below.

<table>
<thead>
<tr>
<th>Section</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Risk Assessment and Rescue Plan</td>
<td>7</td>
</tr>
<tr>
<td>Ascent and Movement to the Casualty</td>
<td>7</td>
</tr>
<tr>
<td>Casualty Assessment and Handling</td>
<td>13</td>
</tr>
<tr>
<td>Descent</td>
<td>7</td>
</tr>
<tr>
<td>Landing</td>
<td>11</td>
</tr>
</tbody>
</table>

4.3.3 Up to 5 efficiency points can be awarded based on completion time. Scoring Efficiency Points:

- 5 points – 75.01 seconds or more below time limit
- 4 points – 60.01 to 75.00 seconds below time limit
- 3 points – 45.01 to 60.00 seconds below time limit
- 2 points – 30.01 to 45.00 seconds below time limit
- 1 point – 15.01 to 30.00 seconds below time limit
- 0 points – 00.00 to 15.00 seconds below time limit

4.3.4 In case of a tie, the competitor with the fastest time wins.

4.4 **Penalties**

**Discretionary Penalties**

A 3-point penalty and audible warning will be given by the Event Head Judge for any of the following infractions.

4.4.1 Failure to maintain a taut climbing system or climbing above the tie-in point.
4.4.2 Dangerous uncontrolled swing.
4.4.3 High-speed or dangerous movement.
4.4.4 Failure to issue an audible warning when necessary (excluding descent with dummy). (2017)

4.5 Disqualification

Mandatory Disqualifications
A competitor will be disqualified by the Event Head Judge for the following infractions:

4.5.1 Dropped piece of equipment.
4.5.2 Failure to remain tied in to the tree on at least one point of attachment.
4.5.3 Being more than 5 minutes late for event.
4.5.4 Misconduct.
4.5.5 Breaking of sizable branch (size to be decided prior to the event, at the Event Head Judge’s discretion).
4.5.6 Tampering with the dummy’s independent fall-arrest system.
4.5.7 Failure to safely manage the friction required for the additional weight of the dummy.
4.5.8 Placing handsaw in the mouth.
4.5.9 A second discretionary penalty.

5 THROWLINE EVENT

5.1 Event Summary
The Throwline Event is a timed event that tests the competitor’s ability to accurately place a throwline and/or climbing line in a tree and demonstrate appropriate communication during arboricultural activities. at heights between approximately 10 and 20 meters (32.8 and 65.6 ft). Competitors attempt to toss a throwline or climbing line through two of eight targets. Targets can be located in a single tree, four on each side; or in multiple trees as long as there are two distinct sets of four targets. The targets are worth 9, 7, 5, and 3 points, respectively, depending on the difficulty of the throw. Each competitor is allowed unlimited throws within 6 minutes, but a competitor can score in only one target on each side of the tree. A single throw may be used to score a target on each side of the tree, as long as both targets can be completely isolated.
The lines may be manipulated in the tree. This includes attaching more than one throwline or climbing line together to perform manipulation techniques. A throw is considered legal and scores only when the scoring line (throwline or climbing line) is isolated within the target area, and both ends of the scoring line are ‘touching the ground,’ with no other limbs in between the two parts of the line (‘touching the ground’ includes both ends of the line touching the competitor who is standing on the ground). Additional lines used for manipulation techniques shall be removed from the tree prior to the stoppage of time or the competitor will be assessed a 1-point penalty for each additional non-scoring line left in the tree.

Additional points may be earned for installing a climbing line through one target on each side of the tree. The climbing line shall be pulled through the target with both ends of the rope ‘touching the ground’ in order to score additional points. The value of these additional points depends on the difficulty of the target. Installing a climbing line in a 9-point throw is worth 4 points. See Rule 5.3.4 for points earned for installing a climbing line. (2018)

Competitors may also earn Time Points for efficiency. The competitor needs to score in each set of targets to be eligible for Time Points. For a breakdown of the Time Points, see Rule 5.3.6.

5.2 **Throwline Rules**

5.2.1 Each competitor shall be equipped with, and use, (an):
- approved climbing-style helmet,
- approved eye protection, and
- appropriate clothing and footwear.

5.2.2 The throwline or climbing line shall be thrown by hand from within the predetermined throwing area. Once a line is installed, an approved flipstick may be used to manipulate the line into position. Devices such as sling shots or other mechanical devices may not be used in the Throwline event.

5.2.3 Competitors may use up to three throwlines and up to two climbing lines.

5.2.4 Competitors may use equipment provided, or they may use their own throwlines and climbing lines if these have been approved by the judges.

5.2.5 A competitor tells the judges when he or she is ready to proceed and waits for the Event Head Judge’s signal to start. Time starts when the Event Head Judge says “Go” and instructs the competitor to proceed.
5.2.6 A competitor can throw at any target, in any order, any number of times, and the throwline or climbing line can be manipulated into the desired position once it has been placed in the tree. If the throwline is outside the target, and a climbing line is attached and pulled into the target, but time runs out before a legal score (per Rule 5.2.7) has been made, both ends of the climbing line are “touching the ground” points for the throw will only be awarded if registered before time runs out. This includes attaching more than one throwline or climbing line together to perform manipulation techniques. (2018)

5.2.7 A throw is considered legal and scores only when:

• the throwline or climbing line is isolated within the target (i.e. no other parts of the tree between the lines),

• the competitor, who is standing on the ground, is holding both ends of the line (throwline or climbing line), and

• the competitor has asked the Event Head Judge to register the throw.

The target area includes the width of the tape (from outside edge to outside edge). If a climbing line is thrown, it scores the points for both the throw and the installation once the above conditions have been met. (2018)

5.2.8 When asked by the competitor to register a throw, the Event Head Judge will determine whether the throw meets the criteria in Rule 5.2.7. (2018)

5.2.9 If the Event Head Judge decides that a throw is not legal, the competitor is notified and that throw is not registered. It is the responsibility of the competitor to make sure the judges have accepted the throw as legal. (2018)

5.2.10 A competitor can score only twice (with one throw in each of the two sets of targets), and a throw can score only if it is legal and the judges are told to register it.

5.2.11 Once the judges are told to register a throw, it cannot be changed.

5.2.12 A competitor who breaks a limb larger than a minimum specified diameter and smaller than a maximum specified diameter shall be penalized 1 point for each broken limb, unless it is determined by the Event Head Judge that the break was not due to any unnecessary force being applied to the limb. A third broken limb will result in disqualification. The minimum and maximum limb diameters to incur a
1-point penalty will be set by the Event Head Judge prior to the beginning of the competition.

5.2.13 A competitor who breaks a limb larger than the predetermined maximum size shall be disqualified unless it is determined by the Event Head Judge that the break was not due to any unnecessary force being applied to the limb.

5.2.14 The final time is recorded when a competitor has successfully installed both climbing lines in the tree(s), when the competitor requests the time to stop, or when time has expired.

5.2.15 In the event of a tie, the competitor with the fastest time wins. If the final times are the same, a second tiebreaker will be used: the ‘first score time.’

5.2.16 The ‘first score time’ is recorded only for the purposes that it may be needed as a second tiebreaker. The ‘first score time’ is registered at the first time the competitor asks for either a throwline or climbing line to be registered.

5.2.17 Competitors will be provided 6 minutes to set up and complete the event unless, at the discretion of the Event Head Judge, an alternative time limit is set.

5.2.18 Competitors shall install at least one climbing line over one of the targets within the time limit. A competitor who does not install a climbing line will be penalized 3 points from the score accumulated before time expired.

5.2.19 Any non-scoring lines still in the tree at the end of the competitor’s event will incur a 1-point penalty per line.

5.2.20 If a competitor’s line is within a scoring target, it shall be registered with the Event Head Judge by saying “Score” prior to the competitor throwing again. If the line is not registered with the Event Head Judge prior to the next throw, it cannot be registered and scored at a later stage in that competitor’s event. To earn points for the same side of the tree, the competitor shall pull the throwline out of the tree or use a different throwline and re-throw. If the unscored line is still in the tree at the end of that competitor’s event, it incurs a 1-point penalty. (2017)

5.2.21 A competitor whose climbing line becomes detached and falls from the throwline before it is placed in the target area and declared legal will not be disqualified for dropped equipment.

5.2.22 If the throwline was not declared a legal score before the climbing line
was dropped, the competitor may re-throw the throwline or climbing line at the same set of targets. (2017)

5.2.23 A competitor who cannot reach a declared and legally scored throwline and re-attach it to the climbing line is finished with that side of targets. The competitor will receive points only for the declared and legally scored throwline.

5.2.24 If a competitor’s throw weight and/or climbing line leaves the flagged area during a throw, while being manipulated or otherwise removed from the tree, a 3-point penalty is assessed. A second offense will result in disqualification from the event.

5.2.25 Competitors shall issue the audible warning, “Stand clear,” and receive confirmation of “All clear” from the Event Head Judge before throwing or removing a throwline with the throw weight attached. An audible warning shall also be issued before manipulation of the throwline when the possibility of accidental removal of the throw weight exists. Failure to issue audible warnings will result in a 1-point deduction for each infraction of this rule. Two 1-point audible penalty warnings will be issued. The third offense will result in disqualification.

5.3 Scoring the Throwline (30 possible points)

5.3.1 Competitors may register a maximum of two throws with the judges: one score per set of targets. (2017)

5.3.2 The time taken to legally register the first score will be recorded, as well as the time to legally register both throws (and/or also install the climbing lines).

5.3.3 The highest (or most difficult) target scores 9, the middle targets score 7 and 5 respectively, and the lowest (or easiest) target scores 3.

5.3.4 Additional points can be scored for installing a climbing line over one target in each set. Installing a climbing line in a 9-point throw is worth 4 points, a 7-point throw is worth 3 points, a 5-point throw is worth 2 points, and a 3-point throw is worth 1 point.

5.3.5 A 3-point penalty is assessed to any competitor who does not install at least one climbing line within the time limit provided.

5.3.6 A competitor can also score Time Points for efficiency. Time Points are awarded as follows:

• 4 points – completed the event in 3:00.00 minutes or less
• 3 points – completed the event between 3:00.01 and 4:00.00 minutes
• 2 points – completed the event between 4:00.01 and 4:30.00 minutes
• 1 point – completed the event between 4:30.01 and 5:00.00 minutes
• 0 points – completed the event between 5:00.01 and 6:00.00 minutes

Competitors need to score in both sets of targets to be eligible to earn Time Points. (2017)

5.3.7 A competitor can score a maximum of 18 points for hitting the targets (9 on each side of the tree) and an additional maximum of 8 points (4 on each side of the tree) for installing climbing lines. A competitor can also score a maximum of 4 points for completing the event in 3:00.00 minutes or less. (2017)

5.3.8 A competitor’s final placing is based on score, with the highest point total determining the winner.

5.3.9 In the event of a tie, the competitor with the fastest final time is the winner. If the final times are identical, the competitor with the fastest first score time is the winner.

Example scoring:

**Competitor A**
Scores 9 points for hitting the top target, 4 points for installing a climbing line on the first side, and an additional 5 points for hitting a middle target on the other side of the tree, but receives a 1-point penalty for failing to issue an audible warning and runs out of time before installing the climbing line.

*Competitor A* scores \(9 + 4 + 5 - 1 = 17\) points; time 6:00 minutes.

**Competitor B**
Scores 7 points for hitting a middle target and an additional 3 points for installing a climbing line on the first side. *Competitor B* then scores 5 points for hitting the lower middle target on the other side and scores an additional 2 points for installing the climbing line in the second target area. *Competitor B* finishes the event in 3:54.00 and earns an additional 3 Time Points.

*Competitor B* scores \(7 + 3 + 5 + 2 + 3 = 20\) points; time 3:54.00 minutes. (2017)

**Competitor C**
Scores 9 points for hitting the top target on the first side of the tree and then scores an additional 9 points for hitting the top target on the other side but runs out of time before installing a climbing line. *Competitor C*
receives a 3-point deduction for not installing a climbing line. Competitor C scores $9 + 9 - 3 = 15$ points; time 6:00 minutes.

**Competitor D**
Scores 9 points for hitting the top target and an additional 4 for installing the climbing line in the target. Moving to the second side of the tree, the competitor then gets a throwline struck, which can’t be removed, but rebounds and scores 5 points for a throw into the lower middle target. At this point, Competitor D asks the Event Head Judge to stop time. Competitor D receives a 1-point penalty for the line left in the tree.

Competitor D scores $9 + 4 + 5 - 1 = 17$ points; time 5:46.00 minutes. Competitor placing would be 1st – B; 2nd – D; 3rd – A; 4th – C.

### 5.4 Penalties

**Mandatory Penalties**
A competitor will be penalized for the following infractions:

5.4.1 3-point penalty for not installing a climbing line.

5.4.2 1-point penalty for each non-scoring line or throw weight left in the tree when time expires.

5.4.3 3-point penalty for the throw weight or climbing line landing outside the flagged area.

5.4.4 1-point penalty for breaking a limb within the diameter range designated by the Event Head Judge prior to the beginning of the competition. Up to two 1-point penalties will be allowed. A third broken limb within the specified diameter range will result in disqualification.

5.4.5 1-point penalty for each failure to issue an audible warning and receive confirmation of “All clear” from the Event Head Judge before throwing or removing any throwline with a throw weight attached. Up to two 1-point penalty warnings will be audibly issued by the Event Head Judge. The third offense will result in disqualification.

### 5.5 Disqualification

**Mandatory Disqualification**
A competitor will be disqualified for the following infractions:

5.5.1 Being more than 5 minutes late for event.

5.5.2 Two throws (throwlines with weights attached or climbing lines) that
land outside the flagged area.

5.5.3 Third offense of failure to issue an audible warning.

5.5.4 Misconduct.

5.5.5 Third offense of breaking a limb within the diameter range as set by the Event Head Judge prior to the beginning of the competition.

**Discretionary Disqualification**

A competitor may be disqualified, at the discretion of the judges, for the following infractions:

5.5.6 Breaking of a limb larger than the maximum diameter designated by the Event Head Judge prior to the beginning of the competition.

6 **BELAYED SPEED CLIMB EVENT**

6.1 **Event Summary**

The Speed Climb Event tests the competitor’s ability to climb a predetermined route from the ground to about 18 meters (60 ft) up a tree with a belayed climbing system for safety. The event is timed, and the competitor who reaches and rings the final bell of the course in the least amount of time wins. There could be more than one bell placed in the tree to determine the route; in such an event, the climber shall ring all the bells to complete the event.

6.2 **Belayed Speed Climb Rules**

6.2.1 Each competitor shall be equipped with, and use, (an):

- approved climbing-style helmet,
- approved eye protection,
- approved tree-climbing harness, and
- appropriate clothing and footwear.

6.2.2 Competitors shall be tied in with an approved climbing line and friction hitch or device at all times. An impartial belayer provides belay for the competitor during the climb.

6.2.3 Competitors signal the judges when ready and wait for the Event Head Judge to signal that the timers are ready to begin.

6.2.4 The judges start the clock when the competitor’s second foot leaves the ground.

6.2.5 The judges stop the clock when the competitor rings the final bell.
6.2.6 Competitors shall follow the predetermined route and remain tied in at all times.

6.2.7 After completing the climb, the competitor is responsible for bringing the climbing line back down the tree to set the course for the next competitor.

6.2.8 When technician belayed, the competitor may not use the section of the climbing line from the termination attachment on the climbing harness to the top pulley block (the lead of the rope) to advance their position. If this section of the climbing line is used to advance position, the first offense will generate a warning; a second offense will generate a disqualification.

6.2.9 Competitors may use the section of the climbing line from the top pulley block to the ground (the fall of the rope) to aid the climb, or lines set in the tree exclusively to aid in ascent.

6.2.10 Certain branches may be marked with tape to denote a point beyond which the competitor cannot touch. A first offense of touching beyond these marks will result in a 1-point penalty. A second offense will result in disqualification. (2017)

6.2.11 A competitor who breaks a limb larger than the predetermined maximum size may be disqualified at the discretion of the Event Head Judge.

6.3 Scoring the Belayed Speed Climb (15 possible points)*

6.3.1 There will be either three or five Belayed Speed Climb timers. When five timers are available, the high and low times are thrown out, and the remaining three times are averaged to provide the official time.

6.3.2 The event is based purely on time.

6.3.3 The fastest competitor to the top is the winner and receives 15 points.

6.3.4 The remaining competitors’ scores are calculated by subtracting the fastest competitor’s time (in seconds) from the times of each of the other competitors.

6.3.5 For every 2-second difference in time between those scores, 1 point (of the 15 possible points) is deducted from the competitor’s score.

Example scoring:
The fastest competitor completes the climb in 2 minutes, 27.46 seconds (147.46 seconds).
The second-fastest competitor completes the climb in 2 minutes, 41.82 seconds (161.82 seconds).

Time difference = 161.82 – 147.46 = 14.36 seconds = 7.18 point deduction.

The fastest competitor receives 15 points.
The second-fastest competitor receives 7.82 points (15 – 7.18).
*If the Footlock event is run, the Belayed Speed Event is worth 20 points.

6.4 Penalty
Mandatory Penalty
The following infraction will result in a 1-point penalty:
6.4.1 Touching branch beyond tape. (2017)

6.5 Disqualification
Mandatory Disqualification
A competitor will be disqualified for the following infractions:
6.5.1 Second infraction of using the lead of the rope to advance position.
6.5.2 Dropping a piece of equipment.
6.5.3 Failure to remain tied in.
6.5.4 Being more than 5 minutes late for event.
6.5.5 Misconduct.
6.5.6 Second infraction of touching branch beyond tape. (2017)

Discretionary Disqualification
A competitor may be disqualified, at the discretion of the Event Head Judge, for the following infractions:
6.5.7 Dangerous uncontrolled swing.
6.5.8 Leaping or jumping, creating excessive slack.
6.5.9 Breaking of a sizable branch (size to be determined by the Event Head Judge prior to the event).

7 ASCENT EVENT
7.1 Event Summary
The Ascent Event tests the competitor’s ability to efficiently and safely use their selected and approved ascent system. The event assesses the competitor’s efficiency in attaching the ascent system to the ascent line(s), ascending to the bell, and transferring into a descent system. The actual descent is not part of the event. Points are earned for speed as well as for meeting predetermined safety objectives.

Event Setup: The height can be set from 12 to 25 meters (39 ft, 4.5 in to 82 ft, 0.25 in). The finishing bell shall be installed at a distance of 38 centimeters (15 in) horizontally from the competitor’s line. All competitors (men and women) ascend to the same predetermined height. Three sets of times will be recorded: Setup Time (attachment of ascending system to ascent line(s) and on-rope rest), Ascent Time (climb from ground to predetermined height), and Changeover Time (conversion from ascent to descent system). Motorized ascent systems may not be used during the event.

Ascent lines may be set in three configurations (Appendix 7) on a lowerable attachment point. Any combination of mechanical device and knotted cordage approved during gear inspection may be used. Systems will be set up, including the transfer to descent, during the gear inspection and recorded on the scoresheets. The system used during the Ascent Event must be the same system demonstrated during gear inspection.

The ascent lines shall be attached to a lowerable attachment point, controlled by a ground technician using a haul line. Additionally, an overhead belay system shall be in place and competitors shall be on belay at all times while aloft.

7.2 Ascent Event Rules
7.2.1 Each competitor shall be equipped with, and use, (an):
  • approved climbing-style helmet,
  • approved eye protection,
  • approved tree-climbing harness (lightweight harness with dorsal attachment will be provided to be worn under the climber’s harness, if required),
  • approved ascent and descent system, and
  • appropriate clothing and footwear.

7.2.2 Each competitor may configure the ascent line(s) in any format of his/her choice on a lowerable attachment point, as outlined in Appendix 7.
The attachment point will be lowered for each competitor for setup approval. Competitors may use the installed line(s) provided for the event or replace the line(s) with an approved climbing line(s) of the competitor’s choice prior to the timed portion of the event.

7.2.3 The **Event** Head Technician will verify from the scoresheet that the ascent and descent systems used are the same ones demonstrated during gear inspection. If they are not, the competitor will not be permitted to compete in the Ascent Event.

7.2.4 An impartial belayer provides belay for the competitor during the climb.

7.2.5 Competitors shall keep the belay line attached to the harness and remain on belay at all times while participating in this event.

7.2.6 The technician shall perform a test to demonstrate the effectiveness and adjustment of the belay safety equipment with the competitor attached.

7.2.7 The competitor may have his/her climbing system, including non-PPE components, as fully assembled as desired, but nothing may be attached to the ascent-line(s) prior to the start of the event. Any pre-weighting of the ascent line (e.g. adding a shot pouch or tying a knot in the ascent line) is not permitted prior to the **Event** Head Judge saying “Go.” Any moving rope system shall have a stopper knot installed at the end of the line(s) prior to the competitor setting up his/her ascent system. (2018)

**Setup Time**

7.2.8 The competitor shall start the event from a 1-meter (~3-ft) diameter circle marked on the ground. The center of the circle shall be 3 meters (~10 ft) from the ascent line(s).

7.2.9 The competitor advises the Event Head Judge when ready and waits for the Event Head Judge to signal that the timers and technicians are ready to proceed.

7.2.10 Three times shall be recorded for setup. The timers start the clock when the Event Head Judge says “Go.”

7.2.11 When the Event Head Judge says “Go,” the competitor steps out of the circle and attaches his/her ascent system to the ascent line(s). The competitor must attach and configure the ascent system completely, including any foot/knee ascenders, foot loops, chest harnesses, tethers/tenders, etc. The competitor then performs an on-rope test by raising both feet off the ground and placing both arms out away from his/her
body, ensuring that body weight is placed in the ascent system, and not accessory components. This will signal to the Event Head Technician that the competitor has completed the setup. No part of the competitor’s body may be in contact with the ground during the on-rope test.

7.2.12 The timers stop the clock when the Event Head Technician, as signaled by the competitor holding arms out and taking both feet off the ground, says “Time.”

7.2.13 Once time has stopped, the Event Head Technician confirms the correct setup.

7.2.14 If the setup is not successful (e.g. system does not hold or safety components are not attached), setup time will not be awarded.

7.2.15 If any life-support components are not attached or are configured incorrectly, a 3-point mandatory penalty will be given, in addition to the lost setup time. It is the competitor’s responsibility to ensure proper and complete setup prior to signaling to the Event Head Technician.

7.2.16 Once the system has been fully evaluated, the competitor may descend back to the ground. At this time, the competitor has the opportunity to adjust his/her system, (this includes any added weight to the line.), before starting their timed ascent. No components of the pre-approved, configured system may be changed at this time. If changes must be made (e.g. addition of a foot ascender, chest harness, tethers/tenders, gloves, etc.), the competitor forfeits his/her setup time. (2018)

7.2.17 The time limit for the setup is 90 seconds.

Ascent Time

7.2.18 The competitor advises the Event Head Judge when ready and waits for the signal that the timers and technicians are ready to proceed.

7.2.19 Three times shall be recorded for ascent. The timers start the clock when the competitor’s second foot leaves the ground.

7.2.20 The timers stop the clock when the competitor rings the bell at the top of the climb with his/her hand.

7.2.21 The time limit for the ascent is 60 seconds. (2018)

Changeover Time

7.2.22 Three times shall be recorded for the changeover to descent. The
timers start the clock when the competitor rings the bell at the top of the climb.

7.2.23 Immediately after ringing the bell, the competitor must change over to his/her approved descent system. All components of the system that may hinder descent must be detached from the competitor or the ascent line, such that the competitor is able to start the descent without hindrance (e.g. foot ascenders must be detached from the ascent line, but ascenders may be left on the ascent line above the competitor if they are detached from the competitor). Violations of this rule will result in loss of changeover time points. (2018)

7.2.24 All components of the ascent system shall be securely attached to the ascent line or competitor. Equipment must be appropriately secured to the competitor or attached to the ascent line prior to ringing the bell for the second time. Cams left on the ascent line(s) must be engaged. Violations of this rule will result in loss of changeover time points. (2018)

7.2.25 The timers stop the clock when the competitor rings the bell at the top of the climb a second time.

7.2.26 The tree technician must verify that the descent system is attached correctly and no components from the ascent system remain that may hinder descent. If the descent system is not correct, the competitor will not receive changeover points. (2018)

7.2.27 Once the descent mode has been verified by the tree technician, the competitor shall retrieve any components left on the ascent line. After the competitor has communicated with the belayer his/her intent to descend, the competitor may do so at a safe speed.

7.2.28 The competitor is required to remain on belay at all times during the descent.

7.2.29 The descent is not a timed portion of the event.

7.2.30 The time limit for the changeover is 90 seconds.

7.3 Scoring the Ascent Event (25 possible points)

7.3.1 For each section recorded, three stopwatches are used. Time is recorded to the hundredth of a second.

7.3.2 For the Setup and Changeover times, up to 34 Time Points can be awarded based on completion time. Time Points are awarded as follows:

- 34 points – completed in 9.99 seconds or less
• 23 points – completed in 10.00 to 24.99 seconds
• 12 points – completed in 25.00 to 44.99 seconds
• 01 point – completed in 45.00 to 59.99 seconds or more
• 0 points - completed in 60.00 to 89.99 seconds (2018)

7.3.3 A competitor who fails to finish within the time limit in any of the three sections of the event will be called to the ground and will receive only those points accumulated within that time. The time limit for the ascent is 60 seconds. The time limit for each section of the event is the setup and changeover are each set at 90 seconds. (2018)

7.3.4 For the ascent, the three times are averaged to produce the final ascent time. The competitor with the fastest ascent time will receive 17 points.

7.3.5 The remaining competitors’ scores are calculated by subtracting the fastest competitor’s time (in seconds) from the times of each of the other competitors.

7.3.6 For every 2-second difference in time between those scores, 1 point (of the 17 possible points) is deducted from the competitor’s score.

*Example scoring:*

The fastest competitor (A) completes the ascent in 0:12.49 seconds.

The second-fastest competitor (B) completes the ascent in 0:13.33 seconds.

Time difference = 0:13.33 − 0:12.49 = 0.84 seconds = 0.42 point deduction.

The fastest competitor receives 17 points.

The second-fastest competitor receives 16.58 points (17 − 0.42) for the ascent.

7.3.7 Two additional points will be earned for incorporating a series backup in an ascent system (see Appendix 5 for definition). (2018)

7.3.8 In case of a tie, the competitor with the fastest ascent time wins.

7.4 Penalties

Mandatory Penalties

A competitor will receive a 3-point penalty and a warning for the following infractions:
7.4.1 Tampering or interfering with components of the fall-protection equipment.
7.4.2 Preventing the correct function of a mechanical device.
7.4.3 Placing hands above a footlock Prusik.
7.4.4 Misconfigured or detached life-support components during the timed portion of the event.

7.5 **Disqualification Mandatory**

**Disqualification**

A competitor will be disqualified for the following infractions:

7.5.1 A second mandatory penalty.
7.5.2 Dropping a piece of equipment while working aloft.
7.5.3 Failure to remain tied in.
7.5.4 Being more than 5 minutes late for event.
7.5.5 Misconduct.

8 **MASTERS’ CHALLENGE**

8.1 **Event Summary**

The Masters’ Challenge is the championship round of the competition. The top men and top women finishers from the preliminary round advance to the Masters’ Challenge to compete for the title. The Masters’ Challenge is designed to judge the competitors’ overall productivity and skill with a rope and harness in the tree. Competitors are judged and scored on their knowledge and their ability to demonstrate mastery of different climbing techniques, use of equipment, poise in the tree, and safe working practices.

At the Event Head Judge’s signal, “Go,” a competitor enters the designated work area. The competitor shall perform a visual tree assessment, install any necessary climbing and/or belay equipment, and then enter the tree. The competitor proceeds to three work stations in the tree. In some situations, a fourth station may be added to increase the difficulty of the climb and provide additional opportunity for the judges to assess a competitor’s abilities. Each competitor may choose the route and order in which to approach the work stations. At each work station, a competitor should demonstrate the ability to work freely with both hands (2017).
At each of the stations, the competitor shall ring a bell with a handsaw before continuing to the next station. One of the stations is equipped with a graduated plumb bob suspended from the limb. If a competitor puts too much weight on the limb, causing the plumb bob to drop and touch a height marker, fewer points are earned for completing the activity. Another station is equipped with limbs in a bucket and a target on the ground. A competitor is tested on his/her ability to toss limbs to a designated area. A competitor can make three attempts to land a limb into a target. A maximum time to complete the event is specified in advance. The climb is timed to assess overall productivity, but the Masters’ Challenge is not a speed event.

8.2 Masters’ Challenge Rules

8.2.1 Each competitor shall be equipped with, and use, (an):
- approved climbing-style helmet,
- approved eye protection,
- approved handsaw and scabbard,
- approved tree-climbing harness,
- approved work-positioning lanyard, and
- appropriate clothing and footwear.

8.2.2 Prior to a competitor starting the event, all equipment shall be placed in a designated area inside the event arena. Once the time starts, no more equipment can be brought into the designated area or event arena.

8.2.3 All personal protective equipment shall meet the requirements of Rule 2.2.1.

8.2.4 The number of competitors who advance to the Masters’ Challenge depends on the total number of competitors in the event. For competitions with 30 or fewer, three advance; 31 to 40, four advance; 41 or greater, five advance. Exceptions may be made with the approval of the organizing TCC committee and prior to the beginning of the competition.

8.2.5 If one of the top competitors is unable to participate, the competitor with the next highest score may climb as an alternate, at the discretion of the Head Judge.

8.2.6 Once the top competitors have been determined, the Head Judge sets the order in which the competitors climb. The top finisher is given first choice, followed in order of finish during the preliminary round.
8.2.7 Competitors are then sequestered until it is time for each individual competitor to climb. Competitors are sequestered where they cannot visually or audibly benefit until it is time for each individual competitor to climb.

8.2.8 A competitor shall not witness or listen to comments about another competitor’s climb before the time s/he is scheduled to climb, but may watch after completing his or her own climb. For example, the second competitor may not watch the first competitor, but the first competitor may watch the second.

8.2.9 The Head Judge shall set an adequate time limit for a competitor to set up, install a climbing line, perform the climb, and remove all climbing equipment from the tree. This time shall be established and announced before the event begins.

8.2.10 Official timing begins when the Event Head Judge says “Go” and instructs the competitor to proceed.

8.2.11 Official timing stops when a competitor returns to the ground and successfully removes all equipment installed during the event (including all throwlines/throw weights, climbing lines, belay equipment, and climbing hardware). Equipment is considered removed from the tree when it is no longer in contact with the tree.

8.2.12 If a competitor does not complete the climb within the time limit, the score received to that point is used as the competitor’s score. A competitor will be called to the ground by the Event Head Judge if the time limit elapses or safety standards are violated.

8.2.13 If a competitor fails to remove all the equipment in the tree within the time limit, a 20-point penalty will be assessed.

8.2.14 The event is timed as a means of assessing overall productivity. Preliminary ranking will count as a tiebreaker in the case of identical scores. If preliminary rankings are identical, Masters’ time is the final tiebreaker.

8.2.15 Previously installed climbing lines are not permitted in this event.

8.2.16 A competitor receives 10 points for installing the throwline on the first attempt. Each throw attempt thereafter will be worth 2 points fewer, with the fifth attempt worth 2 points. Additional throw attempts will receive 0 points. If more than one access line or climbing line is set by the competitor, points for installing the throwline will only be awarded for the first access or climbing line set.
8.2.17 The tree is divided into five sections for scoring the setting of the throwline in the tree. A competitor receives 1 point for installing the throwline in the lowest section and 5 points for the highest section. A competitor who utilizes more than five throws to install a throwline receives no height points.

8.2.18 A competitor may receive up to 3 additional points, awarded at the discretion of the judges, for creative technique and/or skill displayed while setting the throwline. A competitor who utilizes more than five throws to install a throwline may receive bonus points if applicable.

8.2.19 Competitors shall issue the audible warning, “Stand clear,” and receive confirmation of “All clear” from the Event Head Judge before throwing or removing a throwline with the throw weight attached. An audible warning shall also be issued before manipulation of the throwline when the possibility of accidental removal of the throw weight exists. Failure to issue audible warnings prior to each throw will result in a 1-point deduction for each infraction of this rule. Two 1-point audible penalty warnings will be issued. A third offense will result in disqualification. (2017)

8.2.20 The competitor shall issue an audible warning prior to ringing the bell at each station or tossing the first limb. Failure to issue an audible warning will result in a 3-point penalty. A second failure to issue an audible warning while aloft will result in disqualification. (2017)

8.2.21 If a competitor’s throwline with weight attached leaves the flagged area during a throw, while being manipulated or otherwise removed from the tree, a warning will be issued. A second offense will result in disqualification from the event.

8.2.22 A competitor is awarded up to 10 points for successfully completing each of the following activities:
   a. Handbell Stations: Competitor is required to ring bell with a handsaw.
   b. Limb Toss Station: Competitor is required to first ring bell and then throw a limb at a designated target. If unsuccessful, a competitor may throw a second or third limb. Only one throw will be scored. Ringing the bell is worth 4 points and a successful limb toss is worth 2, 4, or 6 additional points, resulting in a maximum of 10 points. No points will be awarded if the bell is not rung prior to throwing the limb. See Rule 3.4.2 for limb size and target size specifications. (2017)
c. Graduated Plumb Bob Station: The competitor will attempt to ring the bell with a handsaw without allowing the plumb bob to touch the graduated height markers. The graduated height markers will be worth 4, 7, and 10 points. If the weight touches the lowest marker, the competitor does not receive any points for successfully completing the activity (section F on scoresheet) at that station. (2017)

d. No completion points are awarded at stations where a competitor fails to correctly complete the required activity.

8.2.23 Each competitor is scored on the criteria identified on the official scoresheet.

8.2.24 A competitor will be disqualified for dropping a piece of equipment while working aloft. When the competitor is working on the ground during the official timed period (e.g., setting or removing lines or equipment in the tree), equipment that hits the ground will not result in an automatic disqualification. Rather, these infractions shall be judged using the appropriate sections of the scoresheet. Safe use of equipment such as throwbags and various friction-reducing devices should be rewarded. A competitor who removes equipment (e.g., throwbags, friction-reducing devices, ropes) from the tree in an uncontrolled or unsafe manner shall be penalized. It shall be up to the discretion of the judges whether the infractions are deemed accidental or intentional and penalties levied accordingly. An unsafe act may result in disqualification.

8.3 Scoring the Masters’ Challenge (up to 300 possible points)

8.3.1 There will be either three or five Masters’ Challenge judges. When five judges are available, the high and low scores are thrown out, and the remaining three scores are averaged to provide the official score.

8.3.2 The judges score a competitor’s movements from the time the official time begins until the competitor finishes all the work stations, returns to the ground, and successfully removes all equipment installed during the event; runs out of time; or is disqualified.

8.3.3 A competitor receives points only for tasks that were completed within the time limit. If the competitor times out, s/he should receive points in any of the scoring sections even if all of the tasks pertinent to that section have not been completed.

8.3.4 Individual scoresheets are provided to each of the Scoring Judges for
each competitor.

8.3.5 Preliminary points do not carry over to the Masters’ Challenge. The overall winner of the competition will be the competitor with the highest point total in the Masters’ Challenge. For tiebreakers, see Rule 8.2.14.

8.4 Penalties

Mandatory Penalties
A competitor will be penalized for the following infractions:

8.4.1 A 20-point deduction will be assessed for failing to retrieve all equipment within the time limit.

8.4.2 A 1-point penalty for each failure to issue an audible warning before throwing or removing a throw weight (includes mechanical devices).

8.4.3 A 3-point penalty for failure to issue an audible warning when necessary while aloft. (2017)

Discretionary Penalties (determined by Scoring Judges)

8.4.4 A competitor can receive up to a 5-point deduction for any of the following: unsafe acts, poor performance, or poor techniques.

Discretionary Penalties (determined by Event Head Judge)
A 3-point penalty and audible warning will be given for any of the following infractions:

8.4.5 Dangerous uncontrolled swing.

8.4.6 Failure to maintain a taut climbing system or climbing above the tie-in point.

8.4.7 High-speed or dangerous movement.

8.5 Disqualification

Mandatory Disqualification
A competitor will be disqualified for the following infractions:

8.5.1 Dropping a piece of equipment while working aloft.

8.5.2 Failure to remain tied in to the tree on at least one point of attachment.
8.5.3 Third offense of failure to issue an audible warning prior to throwing or removing a throw weight. (2017)

8.5.4 Second offense of failure to issue an audible warning when necessary while aloft. (2017)

8.5.5 Two throws (throwlines with weights attached or climbing lines) that land outside the flagged area.

8.5.6 Being more than 5 minutes late for event.

8.5.7 Misconduct.

8.5.8 Leaving the pre-designated area or bringing in equipment from outside the pre-designated area once the official time has begun.

8.5.9 Placing handsaw in the mouth.

8.5.10 Breaking of sizable branch (size to be decided prior to the event, at the Event Head Judge’s discretion).

8.5.11 A second discretionary penalty (as determined by Event Head Judge).

8.6 Potential Bonuses

8.6.1 A competitor may receive up to 5 additional bonus points, at the judges’ discretion, for each of the following (for a total of 15 potential bonus points):

- Overall demonstration of skill, style, and presentation throughout the climb.
- Use of innovative techniques and equipment.
- Overall demonstration of safe work practices and techniques, including visual tree assessment.
FOR BOXES - JUDGES SHALL ALL AWARD THE SAME POINTS
FOR EACH STATION: MARK THE BOX ON THE TOP LEFT CORNER TO INDICATE IF THE BELL WAS RUNG

**SCORING POINTS**

- **Completed Task:**
  - Lanyarded in, gave audible warning, rang bell with handsaw
  - Rang bell w/ two hands on handsaw
  - Did not use lanyard correctly

- **Completed Task:**
  - Lanyarded in, gave audible warning, rang bell with pole pruner
  - Rang bell w/ two hands on pole pruner
  - Did not use lanyard correctly
  - Used wrong end of pole
  - Did not properly rehang pole

- **Completed Task:**
  - Walked limb out and back, lanyarded in, gave audible warning, rang bell with handsaw
  - Plumb bob points
  - Did not use lanyard correctly

- **Completed Task:**
  - Gave audible warning, sounded horn / rang bell with hand
  - Landed with only foot / feet touching
  - Inner ring - 1 foot in / 2 feet in
  - Outer ring - 1 foot in / 2 feet in

**DISCRETIONARY POINTS**

- Handsaw Station
  - Discretionary Points
  - +
  - -

- Limb Toss Station
  - Discretionary Points
  - +
  - -

- Pole Pruner Station
  - Discretionary Points
  - +
  - -

- Limb Walk Station
  - Discretionary Points
  - +
  - -

- Landing Station
  - Discretionary Points
  - +
  - -

**Penalty:**

- **Mandatory Penalty:**
  - Failure to issue an audible warning
  - QD 3- 0

- **Discretionary Penalty:**
  - For unsafe acts as determined by Event Head Judge
  - QD 3- 0

**ALL BELLS RUNG?**

- Yes
- No

**REASON FOR DQ:**

**SCORED掰 differed by 50 points or more:

**SCORE CHECKED**

**SCORE ENTERED**
INTERNATIONAL TREE CLIMBING CHAMPIONSHIP
AERIAL RESCUE

REQUIRED EQUIPMENT
- Approved Eye Protection
- Approved Climbing Harness
- Approved Climbing-Style Helmet
- Approved Climbing Line
- Appropriate Footwear
- Approved Work-Positioning Lanyard
- Appropriate Clothing

2017

FOR BOXES - JUDGES SHALL ALL AWARD THE SAME POINTS

SCORING POINTS

Risk Assessment & Rescue Plan

Communicated with the casualty and determined responsiveness [0, 1]
- Scoring

Contacted emergency services and provided relevant information [0, 1, 2]
- Discretionary Points

Assessed hazards and determined if safe to perform rescue [0, 1, 2]

Communicated and initiated rescue plan [0, 1, 2]

Ascent & Movement to the Casualty

Verified ascent line and anchor point are safe to use [0, 1]
- Scoring

Safe, smooth, and efficient ascent [0, 1, 2]
- Discretionary Points

Safe, suitable, and efficient movement to casualty [0, 1, 2]

Communicated appropriately with casualty and ground personnel [0, 1, 2]

Casualty Assessment & Handling

Secured at the casualty in a safe working position [0, 1]
- Scoring

Assessed casualty injury and equipment [0, 1, 2, 3]
- Discretionary Points

Administered appropriate first aid [0, 1, 2, 3]

Stabilized casualty correctly for transport [0, 1, 2, 3]

Transferred casualty from attachment/branch to competitor [0, 1, 2, 3]

Descent

Issued audible warning before beginning descent [0, 1]
- Scoring

Maintained casualty in stable and suitable position [0, 1, 2]
- Discretionary Points

Safe, smooth, and controlled descent [0, 1, 2]

Communicated condition of casualty and instructions to ground personnel [0, 1, 2]

Landing

Competitor and casualty landed on the ground [0, 1]
- Scoring

Unclipped casualty within the time limit [0, 1, 4, or 5]

Landed casualty in a comfortable position appropriate to injury [0, 1, 2]
- Discretionary Points

Reached ground in a comfortable posture [0, 1, 2]

Audible communications and timely transfer to emergency services [0, 1, 2]

Discretionary Penalties for unsafe acts determined by Event Head Judge

Penalty

- DISQUALIFICATION

0, 3 or DQ

Reason for DQ:

TIMER 1

MIN SEC 1/100

TIMER 2

MIN SEC 1/100

Scored at the casualty in a safe working position

Risk Assessment & Rescue Plan

Communicated with the casualty and determined responsiveness [0, 1]
- Scoring

Contacted emergency services and provided relevant information [0, 1, 2]
- Discretionary Points

Assessed hazards and determined if safe to perform rescue [0, 1, 2]

Communicated and initiated rescue plan [0, 1, 2]

Ascent & Movement to the Casualty

Verified ascent line and anchor point are safe to use [0, 1]
- Scoring

Safe, smooth, and efficient ascent [0, 1, 2]
- Discretionary Points

Safe, suitable, and efficient movement to casualty [0, 1, 2]

Communicated appropriately with casualty and ground personnel [0, 1, 2]

Casualty Assessment & Handling

Secured at the casualty in a safe working position [0, 1]
- Scoring

Assessed casualty injury and equipment [0, 1, 2, 3]
- Discretionary Points

Administered appropriate first aid [0, 1, 2, 3]

Stabilized casualty correctly for transport [0, 1, 2, 3]

Transferred casualty from attachment/branch to competitor [0, 1, 2, 3]

Descent

Issued audible warning before beginning descent [0, 1]
- Scoring

Maintained casualty in stable and suitable position [0, 1, 2]
- Discretionary Points

Safe, smooth, and controlled descent [0, 1, 2]

Communicated condition of casualty and instructions to ground personnel [0, 1, 2]

Landing

Competitor and casualty landed on the ground [0, 1]
- Scoring

Unclipped casualty within the time limit [0, 1, 4, or 5]

Landed casualty in a comfortable position appropriate to injury [0, 1, 2]
- Discretionary Points

Reached ground in a comfortable posture [0, 1, 2]

SET UP OF CLIMBING LINE / EQUIPMENT / ENTRY INTO TREE (15 Points possible - enter 0, 1, 2, or 3 in each box)

SET UP:
- Visual Tree Assessment
- Installation of Climbing Line / Equipment
- Safe and Efficient Set up

ENTRY:
- Method: Suitable, safe, always secure
- Ascent: Smooth, fluid, efficient use of energy

WORK STATIONS (240 Points possible / 60 per station - enter 0 thru 10 per box)

A) Maintain proper tension in the fall-protection or work-positioning system
B) Rope management
C) Tie-in point or re-direct suitable for situation and work station
D) Confident posture and balance at station
E) Overall work plan, selection of route, control of movement to and from station
F) Correctly completed station

JUDGES SHALL ALL AWARD THE SAME POINTS

0 or 10 0 or 10 0, 4, 6, 8, 10 0, 4, 7, 10

DESCENT, LANDING, RETRIEVAL OF EQUIPMENT (12 Points possible - enter 0, 1, 2, or 3 in each box)

Well-planned descent, rope control, not tangling lines
Proper descent speed, smooth descent, balanced landing
Smooth gear retrieval, done without struggle
Safe / Controlled gear retrieval

JUDGE’S DISCRETIONARY BONUS POINTS (15 Points possible - enter 0 thru 5 per box)

Overall demonstration of skill, style and presentation
Use of innovative techniques and equipment
Overall safe work practices and techniques

PENALTIES

Scoring Judges’ Discretionary Penalties for Unsafe acts, Poor Performance, or Technique (0 THRU -5)

Head Judge’s Discretionary Penalties for Unsafe Acts
Mandatory Penalty for failing to remove all equipment from tree
Mandatory Penalty for failing to issue an audible warning when necessary while aloft
Mandatory Penalty for failure to issue an audible warning while throwing
